

Journal of Integrative Plant Biology 2019 Newsletter

JIPB's 2018 Impact Factor: 4.061

The JIPB 5-year SCI impact factor (IF) is 4.061 and 2-year IF is 3.824, according to 2018 Journal Citation Report. Among 228 SCI-indexed Plant Science journals in the world, JIPB ranks 26th (top 11.4%, Q1 category). The total citations of JIPB in 2018 are 4,282.

New Editors:

JIPB recruited 38 new Editors in the last year.

Huazhong Shi, Texas Tech University, USA; Jianguo Huang, South China Botanical Garden, CAS, China; Shaopeng Wang, Peking University, China; Rongcheng Lin, Institute of Botany, CAS, China; Feng Tian, China Agricultural University, China; Xuewei Chen, Sichuan Agricultural University, China; Zhong Zhao, University of Science and Technology of China, China; Dingzhong Tang, Fujian Agriculture and Forestry University in Fuzhou, China; Pengcheng Wang, Shanghai Institutes for Biological Sciences, CAS, China; Guangmin Xia, Shandong University, China; Baohui Liu, Guangzhou University, China; Letian Chen, South China Agricultural University, China; Zhongfu Ni, China Agricultural University, China; Shuhua Yang, China Agricultural University, China; Jin-Song Zhang, Institute of Genetics and Developmental Biology, CAS, China; Zhixi Tian, Institute of Genetics and Developmental Biology, CAS, China; Hong-Quan Yang, Shanghai Normal University, China; Jiamu Du, Southern University of Science and Technology, China; Chun-Peng Song, Henan University, China; Yijun Qi, Tsinghua University, China; Fei Yu, Northwest A&F University, China; Bao Liu, Northeast Normal University in Changchun, China; Honghui Lin, Sichuan University, China; Ning Ning Wang, Nankai University, China; Haiyun Ren, Beijing Normal University, China; Jinxing Lin, Beijing Forestry University, China; Xia Li, Huazhong Agricultural University, China; Jian-Min Zhou, Institute of Genetics and Developmental Biology, CAS, China; Jianru Zuo, Institute of Genetics and Developmental Biology, CAS, China; Diqiu Yu, Xishuangbanna Tropical Botanical Garden, CAS, China; Yidan Ouyang, Huazhong Agricultural University, China; Rosa Lozano-Duran, Shanghai Center for Plant Stress Biology, CAS, China; Jie Luo, Hainan University, China; Daolin Fu, University of Idaho, USA; Chengwei Yang, South China Normal University, China; Xingliang Hou, South China Botanical Garden, CAS, China; Chaoying He, Institute of Botany, CAS, China and Ramin Yadegari, The University of Arizona, USA. (In chronological order)

2019 Key Events

JIPB Sponsored Conferences

JIPB plays active roles in the plant science community. In 2019, we sponsored the 30th International Conference on Arabidopsis Research (ICAR2019), Wuhan, China (June 16 to 21, 2019); the 9th Asia and Oceania Conference on Photobiology (AOCP), Qingdao, China (September 21 to 24, 2019); the Chinese National Congress of Plant Biology in Chengdu, China (October 11 to 14, 2019).

Special Issues: Polyploidy and evolution (Volume 61 Issue 1), Barley and wheat biology (Volume 61 Issue 3), Seed biology (Volume 61 Issue 5), Maize biology (Volume 61 Issue 6) and Plant peroxisomes (Volume 61 Issue 7)

In 2019, JIPB has published five Special issues focusing on Polyploidy and evolution, Barley and wheat biology, Seed biology, Maize biology and Plant peroxisomes.

The Special issue on **Polyploidy and evolution** was organized by Prof. Yuxian Zhu. This issue included 1 letter to the editor and 5 research articles. Studies on population genetics, polyploid evolution, gene duplication, and TE functions in cotton, *B. napus* and also in potato, provide a basis for the better utilization of polyploid crop plants.

The issue on **Barley and wheat biology** was organized by JIPB Editor Prof. Thorsten Schnurbusch. This issue included 7 reviews, 1 research articles. Prof. Thorsten Schnurbusch aims to highlight exciting current and future research topics in this special issue to attract more research in the areas of wheat and barley biology.

The Special issue on **Seed biology** was organized by JIPB Editor Prof. John Harada. This issue included 3 reviews, 5 research articles. This special issue covers a range of topics of critical importance to seed biology. The articles provide new fundamental information and/or incisive insights into the cellular processes that underlie key aspects of seed growth and development.

The issue on **Maize biology** was co-organized by JIPB Editors Profs. Jianbing Yan and Bao-Cai Tan. This issue included 7 research articles. The organizers pointed out that the maize functional genomics research in China is flourishing, and new technologies and fields are endlessly emerging. More knowledge gained from basic research has been applied to breeding to make due contribution to ensuring food security.

The Special issue on **Plant peroxisomes** was organized by JIPB Editor Prof. Jianping Hu. The four reviews and three research articles in this special issue on plant peroxisomes provide new insights into the diverse roles and dynamics of these structurally simple but functionally complicated organelles, raising exciting new questions for future investigations.

Special Issues in 2020:

Special issue on Invited Expert Reviews for Plant Research Progress has been published as Volume 62, Issue 1. JIPB is proud to announce the upcoming Special issues on Photobiology and on Plant Biotic Interactions will be published in May and in November, 2020 respectively. More information is available at: <http://www.jipb.net/EN/article/showSpecialIssues.do>

JIPB Awards in 2019

JIPB was selected as Award-winning journal of the People's Republic of China for the 26th Beijing International Book Fair

JIPB won the award of the Highest International Impact Academic Journal of China by China National Knowledge Infrastructure (CNKI)
