

JIPB Special Issue on Plant Vascular Biology

Issue No. 1, January 2010

Issue Editor:

Prof. Bill Lucas
Professor and Chair
Section of Plant Biology
College of Biological Sciences
University of California, Davis
Davis, California, USA

JIPB are pleased to introduce the contributing authors and the titles of their papers for this issue:

- 1) **Ying Wang and Biao Ding**, Viroids: Small Probes for Exploring the Vast Universe of RNA Trafficking in Plants
- 2) **Leslie Sieburth and Dong-Keun Lee**, BYPASS1: How a Tiny Mutant Tells a Big Story About Root-to-Shoot Signaling
- 3) **Yuki Hirakawa, Yuki Kondo, and Hiroo Fukuda**, Regulation of Vascular Development by CLE Peptide-receptor Systems
- 4) **Brett Ferguson, Arief Indrasumunar, Satomi Hayashi, Meng-Han Lin, Yu-Hsiang Lin, Dugald Reid, and Peter Gresshoff**, Molecular Analysis of Legume Nodule Development and Autoregulation
- 5) **Charles S. Buer, Nijat Imin, and Michael A. Djordjevic**, Flavonoids: New Roles for Old Molecules
- 6) **Juan Du and Andrew Thomas Groover**, Transcriptional Regulation of Secondary Growth and Wood Formation
- 7) **Toru Kudo, Takatoshi Kiba, and Hitoshi Sakakibara**, Metabolism and Long-distance Translocation of Cytokinins
- 8) **David J Hannapel**, A Model System of Development Regulated by the Long-distance Transport of mRNA
- 9) **Ya Tang, Jiasui Xie, and Shu Geng**, Marginal Land-based Biomass Energy Production in China

Contributing authors benefit from:

- All articles in the special issue will be open access;
- All charges (page and color) will be waived by the journal;
- Two free copies and 30 free reprints (upon request);
- A focused topic.
